

## NOTIFICATION: DSB PROD - Updates to REST Enterprise HTTP response code for maintenance windows

**Audience: All REST Enterprise Users**

### Notification details:

The purpose of this note is to inform DSB users that the HTTP response given over REST for Enterprise users during the maintenance window are to be updated. Additional details are listed below:

- At present the Production REST Enterprise Service responds with **HTTP 404** (NOT FOUND). The update will replace this response with **HTTP 503** (SERVICE UNAVAILABLE) during scheduled maintenance periods.
- The change will be implemented this weekend on **17<sup>th</sup> February 2018 12:00 PM UTC** to correct this response.
- After this change all Production REST Enterprise users will receive **HTTP 503** response during the scheduled maintenance periods.
- This change does not impact the REST service and the standard maintenance period of 12 PM Saturday to 12 PM Sunday will still be in effect.
- This change was successfully implemented and tested in UAT on the 10<sup>th</sup> February 2018.

### Action Required:

- None: REST Enterprise users are expected not to send any ISIN requests during the maintenance period but any attempt will now result in HTTP 503 instead of HTTP 404.

Please contact [technical.support@anna-dsb](mailto:technical.support@anna-dsb) if you have any other issues or concerns regarding this change.
